

## Staphylococcus (Staph) MMS Testimonial, Timor, Indonesia, 2018

Where: NTT Timur, Indonesia.  
When: August 2018  
Time of treatments: Max seven days  
Using: MMS, DMSO, Teatreeoil, Calendula

In August 2018 there was kind of an epidemic of Staph in all the villages. The local people does not know anything about Staph. There is very little medical care, and some are scared to go to hospital here. So, I gave MMS to this 15 year old girl. Kind of an emergency treatment. I first opened the blister on her mouth, squised the wite stuff out and than cleaned it with a MMS – DMSO mixture. After i put a pflaster whith teatreeoil on. I made her a Protokoll 1000 bottol and next day, after less than 24 horas, the swelling whas gone nearly compleatly. I made her drinking Protokoll 1000 for several days, but min. three days and put teatreeoil and calendula cream on her lip. I watched her for a few more weeks, whithout any returning of the Staph!

All cases i watched for several weeks after and at non of them the Staph had returned!

At the same time there where 5 Staph people i treatet with MMS. A 30 year old lokal friend had this very big Staph wound on her leg, and an other smaller one on her bally, and a little one on the leg. I cleaned it with MMS – DMSO and did put a pflaster with teatreeoil and calendula cream on it. I although made her drinking Protokoll 1000 for some days. The result agane was amazing! Her big wound was closed up after 12 hours (photo) and heald up compleatly after one week, include the other two blisters she had.

I had as good results with an other Lady same age. She had a big one at her ankle and a swallen food, plus fever. Fever was gone next morning, three days Protokoll 1000 was enough for her. While one girl didn't take the Protokoll 1000, MMS didn't work. I got cephalixin from the Hospital.

Although for some western people the MMS didn't work as well as for the lokal people, where i have seen amazing healing results in a very short time. As well MMS worked very well for Indo Flue, Typhus and more.

There where no side effects, no pain, no stress, no costs involved!
